

IMMEDIATE RELEASE

OTIS TECHNOLOGY RECEIVES GOLD AWARD FROM GOVERNMENT For the second consecutive year

Columbus, Ohio: Otis Technology is honored to have been recognized by the Defense Supply Center Columbus (DSCC) for their outstanding performance as one of the government's best product suppliers. The recognition for the Excellence Award is DSCC's way of congratulating contractors who maintain high performance standards and supply the government with high quality products.

Very few businesses receive a DSCC Gold Award. Winners are businesses that have met stringent quality and delivery requirements which are established by the Defense Logistics Agency (DLA). An Automated Best Value System (ABVS) collectively reports on vendors past performances and delivery, translating the information into a numerical score ranging from 0-100. Otis Technology is honored by DSCC for quality performance as a government contractor.

"It is extremely gratifying to be recognized for the support we offer the war fighter. There is no better job than when you can be proud of your work and know you are making a difference," states Nancy Szewczyk-Davoy, manager of contract administration at Otis Technology.

In order to be eligible for an award, all vendors must have shipped 50 or more contract line items or products for DSCC during a 12-month period. To qualify for a Gold Award, a contractor must have a perfect score of 100. A score of 99.0 to 99.9 earns a Silver Award, and 98.0 – 98.9 will earn a Bronze Award. Otis Technology has displayed continuous improvement by earning a Bronze Award in 2006, Silver Award in 2007 and 2008 and now the Gold Award for the second year in row, 2010 and 2011.

DSCC is known to more than 25,000 military and civilian customers. DSCC teams with more than 6,000 suppliers of land and maritime weapon system parts.

The award ceremony was held during the 2011 National Defense Industrial Association (NDIA) DLA Supplier Exhibition in Columbus, Ohio.

Otis Technology supplies gun care cleaning systems to the Department of Defense (DOD) and other agencies and is known for manufacturing the most advanced gun cleaning systems available. The superior Breech to Muzzle™ design combined with unmatched quality has positioned Otis as the gun care system of choice with the US Military.
